

EM35M Series

High Current, Plastic Power Supply Connectors

Features

1. High current capability (three-phase power supply and ground) with 4pos.

- · 3 positions each with a rated current of 50A when using 8 AWG or corresponding cable. (70A per contact with 8 AWG wire and ambient temperature 25°C.)
- · 3 positions each with a rated current of 30A when using 10 AWG or corresponding cable. (Please refer to the charts below concerning the relation between ambient temperature and working current value.)

2. Easy crimp termination

Crimp contacts are used so anyone can perform uniform termination.

3. Standard tooling available

Contacts can be crimped with a standard tool in accordance with JIS C 9711.

4. Sequential mating

Ground contacts connect before power contacts touch.

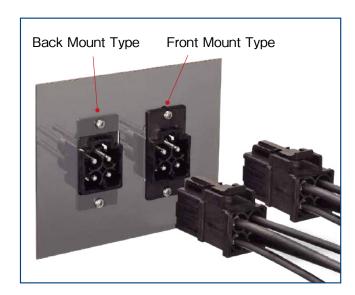

5. Snap-in lock is easy to operate

Lock operation can be done by simply snapping the plug to the receptacle.

6. Attachment Styles

- · DIN rail mount type Snap-on attachment to 35mm width DIN rail.
- · Panel attachment type Both front and rear mounting applicable.

7. Ten keying combinations possible

Guide keys prevent incorrect insertions when multiple connectors are used together at the same time.

8. Meets approved safety standards

TÜV, UL certified.

Product Specifications

		30A	50A	Storage Temperature Range	-10 to +60℃
	Rated Voltage	500V AC/DC			

Note 1: The value of rated current varies based on the ambient temperature. It is recommended to use the product within the derating curve zone. When using a UL or TÜV approved product, please use the product within the specified range as well as the derating curve area. Note 2: Includes the temperature rise due to current flow.

Item	Specification	Condition		
Contact Resistance	1mΩ Max.	Measured at 1A DC		
Insulation Resistance	5000M Ω Min.	Measured at 500V DC		
Withstanding Voltage	No flashover and insulation breakdown	4260V AC for 1 min.		
Vibration Resistance	No electrical discontinuity of 10 μ s or more	10 to 50 to 10Hz/cycle, single amplitude of 0.75mm, five minutes/cycle, three directions, 10 cycles for each direction		
Shock Resistance No electrical discontinuity of 10 μ s or more		Acceleration of 490m/s ² , duration of 11ms, three directions, three times for each direction		
Mating Durability	Contact resistance : 1m Ω Max.	100 cycles		
Temperature Cycle	Insulation resistance : 5000M Ω Min.	-55°C for 30 minutes → room temperature for 2 to 3 minutes → +125°C for 30 minutes → room temperature for 2 to 3 minutes, 5 cycles		
Humidity Resistance (Normal Condition)	Insulation resistance : 50M Ω Min. (at high humidity condition) 500M Ω Min. (at dry condition)	Exposed for 96 hours at the temperature of $40^\circ\!\!\mathrm{C}$ and a humidity of 90 to 95%		

Derating curve

Note 1: The derating curve is a curve is derived by multiplying the basic curve by the derating factor of 0.8.

Note 2: The value of rated current varies based on the ambient temperature. It is recommended to use the product within the derating curve zone.

When using a UL or TÜV approved product, please use the product within the specified range as well as the derating curve area.

Coding Key

Coding keys are used to create keying combinations to prevent incorrect insertion. This is especially useful when multiple parts are being used together. Coding keys need to be installed on both the plug and receptacle when creating specific combinations.

Please contact a Hirose representative for details and proper use of coding keys.

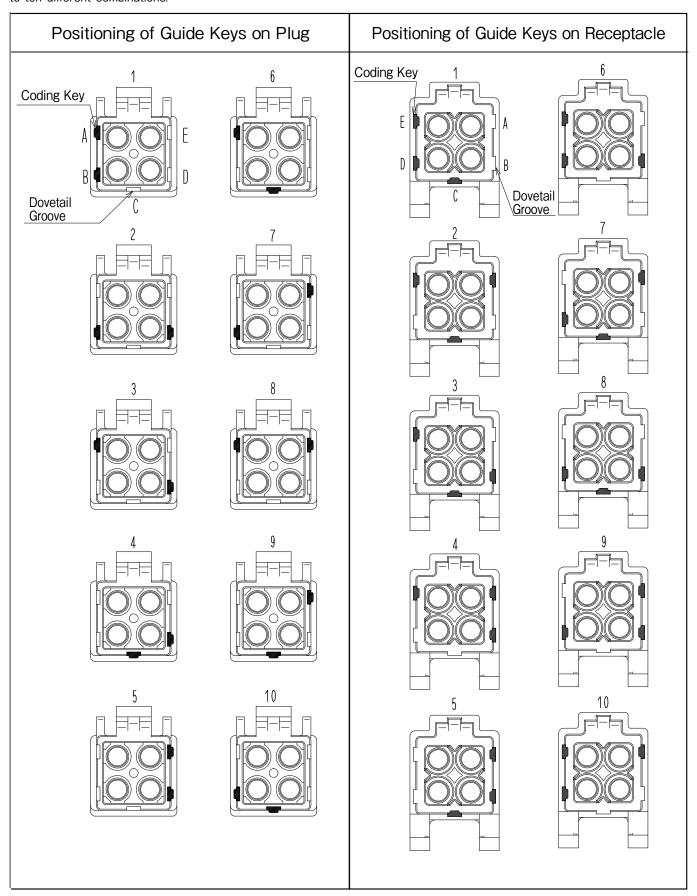

Part No.	HRS No.	Purchase Unit
EM-GK	CL0138-0026-5-00	25pcs per bag (Note)

Note: Each sprue holds 4 coding keys and yields a total of 100 coding keys.

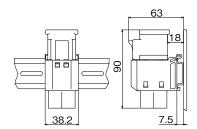

Coding Key Combination Table

Using two coding keys on the plug and three on the receptacle can make up to ten different combinations.

Precautions when using the EM Series Connectors

- 1. Switch off the power before mating or un-mating the connectors.
- 2. Do not touch the contacts when the connector is energized. Doing so is dangerous and can lead to injury.
- 3. Please contact a Hirose representative for harness work procedures and instruction manuals.

While taking in consideration

Specifications mentioned in this catalog are reference values.

When considering to order or use this product, please confirm the "Drawing" and "Product Specifications" sheets. Use an appropriate cable when using the connector in combination with cables.

If considering usage of a non-specified cable, please contact your sales representative.

If assembly process is done by jigs & tools which are not identified by Hirose assurance will not be given.

Please consult with your Hirose sales representative if you are planning to use the product for any of the following applications. (Automotive, medical, public infrastructure, aerospace/defense, etc.)

Hirose will consider the validity of the warranty depending on the conditions.
