### Appendix 1. Condition of safety standard (UL, C-UL, TUV STANDARD)

This item got approved by safety standard(UL, C-UL, TUV STANDARD) under the condition of table 1 and table 2. Safety standard is different up to the applied rated voltage and current please see the table 1 and table 2.

Table 1. UL, C-UL condition

	Condition 1	Condition 2	
Current voltage(AC/DC)	600V		
Current rating	100A	150A	
Cable	14 to 22sq AWG#5 to AWG#3 (*1)	38 to 50sq AWG#1 to AWG#1/0 (*1)	
Creepage distance(*2)	MIN:3.2mm		
Clearance distance(*2)	MIN:3.2mm		

Table 2. TUV conditon

	Condition I	Condition I	Condition III	
Current voltage (AC/DC)	800∨	600V	1000V	
	100A(cable 14 to 2	22sq , AWG#5 to AWG	#3 *1)	
Current rating	125A(cable 38sq ,	AWG#1 *1)		
	150A(cable 50sq ,	AWG#1/0 *1)		
Over voltage category	п	п		
Pollution degree		3		
Creepage distance(*2)	MIN:12.6mm	MIN:12.6mm	MIN:16mm	
Clearance distance(*2)	MIN:6mm	MIN:6mm	MIN:8mm	
Insulation system	Basic insulation(panel has the earth)			

\*1: As screws and crimp terminal attached with power contact have an impact on the creepage distance and the clearance distance, please use recommended screws and crimp terminals. In case you use cables other than following recommended screws and contacts, please be careful that the creepage distance and the clearance distance meet the standard of UL, C-UL, TUV.

-Recommended screw : JIS B 1188 spring washer + cross recessed pan head screw with captive

polished circular washer M6  $\rm X~12$ 

-Recommended crimp terminal

Cable 14sq : JIS C 2805 R14-6 Cable 22sq : JIS C 2805 R22-6

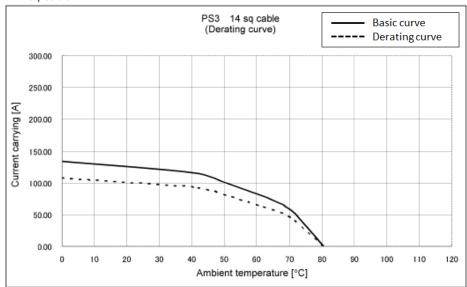

Cable 38sq : Manufactured by NICHIFU CO., LTD R38-6S Cable 50sq : Manufactured by NICHIFU CO., LTD R60-6S

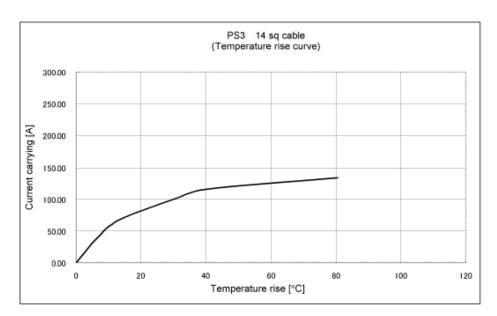

- \*2: The coverage of the creepage distance and the clearance distance is as follows.
  - -Between crimp terminals
  - -Between power contact and panel
  - -Between crimp terminal and panel
  - -Between screws (attacehd with power contact) and panel

# Appendix 2. Derating curve (reference)

#### i. 14 sq cable

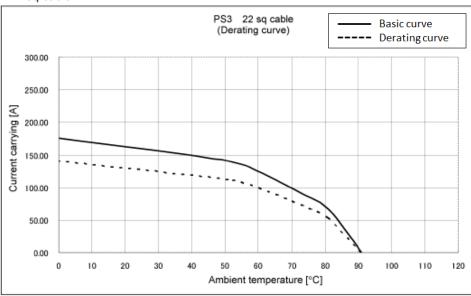

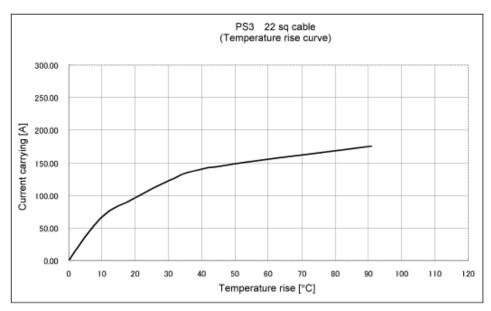

- Note 1: Derating curve takes manufacturing tolerances into consideration as well as uncertainties in temperature measurement and the measuring set up and is derived from the base curve multiplied by 0.8 calculation.
  - 2: The value of rated current differs depending on the ambient temperature.
    - It is recommended to use the product within the derating curve zone.
    - If used under UL or TUV STANDARD, please refer to the appendix 1.
  - 3: Measurement method of derating curve is shown below.
    - -Test specimen: PS3-2UP(11) (male contact)
      - PS3-2US(11) (female contact)
    - -Test cable spec: 14 mm<sup>2</sup> (AWG#5)
    - -Test condition: Turn on electricity under the static state and measure.
