

MIL Compliant Product

HIF3M*W Series

MIL-C-83503

■ Features

1. MIL Compliant product

- MIL Compliant product (MIL-C-83503)
- Suited for wide range of applications (both internal and external connections)
- Mating compatible with HIF3 series

2. UL Certified

- UL certified connector

3. Mis-Insertion Prevention Mechanism

- Dual guide systems prevent mis-insertion
 1. MIL-compliant guide key (polarizing key) system
The guide system matches the convex shape on the pin header (polarizing key attached) with the concave shape on the socket (polarizing key cavity).
 2. Polarizing guide/slot system
The guide system matches the polarizing slot on the pin header with polarizing guide (mis-insertion prevention guide) on the socket.

4. Superior Usability

- A wide lock on the pin header and the long depth of the socket clamp makes push/pull action easier.
- The body and the protector of the socket can be detached, which makes cable assembly operation easier.

■ HIF3M*W Series Products

● Pin header

HIF3M*W
MIL type pin header

● Socket

HIF3M*W
MIL type pin cable socket

■ Product specification

Ratings	Rated current 1A	Rated voltage AC200V
	Operating temperature : -55°C to 85°C (Note 1)	Operating humidity range : Relative humidity 85% or less (No condensation)
	Storage temperature : -10°C to 60°C (Note 2)	Storage humidity range : 5% to 85% (Note 2)

Items	Specifications	Conditions
1. Insulation resistance	1,000MΩ or more	Measured at DC500V
2. Withstand voltage	No flashover, breakdown	650V AC/1 minute
3. Contact resistance	15mΩ or less	Measured at 0.1A
4. Vibration resistance	No electrical shut-off of 1μs or more	Frequency 10-55Hz, half amplitude 0.75mm, 2 hours in 3-axial directions
5. Moisture resistance	Insulation resistance : 1,000MΩ or more	Temperature 40±2°C, humidity left for 96 hours in 90 to 95%
6. Temperature cycle	No damage, cracks, or parts looseness.	Temperature -55 → 5 to 35 → 125 → 5 to 35°C Time tested for 30 → 5 → 30 → 5 minutes, 5 cycles
7. Push-pull life	Contact resistance : 15mΩ or less	500 times of push-pull actions
8. Soldering heat resistance	No deformation of components affecting performance.	Solder bath : 260°C for 10 seconds Hand soldering : Temperature of soldering iron 360°C,

Note 1 : Includes temperature rise caused by current flow.

Note 2 : The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non conducting condition of installed connectors in storage, shipment or during transportation.

■ Materials / Finish

● Pin header

Parts	Material	Color / Finish	Remarks
Lock	PBT	Black	UL94V-0
Insulator			
Contact	Brass	Contact part : gold plated 0.15μm MIN.	—
		Dip part : pure tin plated 2μm MIN.	—

● Socket

Parts	Material	Color processing	Remarks
Insulator	PBT	Black	UL94V-0
Contact terminal	Copper alloy	Contact part : gold plated 0.15μm MIN.	—
		IDC part : nickel plated 2.5μm MIN.	—

Product Number Structure

Refer to the chart below when determining the product specifications from the product number.
Please select from the product numbers listed in this catalog when placing orders.

● Pin header (Right angle)

HIF **3** **M*W** - ***** **PA** - **2.54** **DS**

◆ How to assemble the socket side (IDC)

IDC press method : Dedicated tools as shown below are required for connection press of cables.

1. Place the protector on the guide plate.

2. Place the cable on the top of the protector.

3. Place the socket body on the top of the cable.

4. Depress the handle to terminate the socket body and the cable.

5. In order to enhance the connection reliability, fold back the cable and press down the clamp.

6. Pull the cable and eliminate deflection.

*For details on cable connection and applicable termination tools, see "HIF Series Ribbon Cable Connection Instruction Manual".
 *HIF3M*W Series can be assembled by using the same tools with HIF Series.

MEMO :

Area with horizontal dashed lines for writing.
