3. Operation procedure

3-1. Insertion

① 3-1-a. Positioning for insertion:

: Adjust the position for insertion according to the locks of the socket or In-line plug.

Fig. 2. Positioning for insertion

① 3-1-b. Insertion:

Insert the socket till it clicks while retaining the adjusted position.

Then, it is not needed to handle the lock portion

(If it is inserted the socket by pushing the lock portion, it does not hear click sound.)

Fig. 3. Insertion

Attention 1. To avoid degraded quality, do not tilt the socket for insertion as shown in the figure below.

Fig. 4. Forbidden insertion (1)

Attention 2. Avoid insert socket by bundling the cable or applying stress to the socket like below picture shown.

Fig. 5. Forbidden insertion (2)

1 3-1-c. Check fitting:

Make sure the socket has been firmly fit with the header or In-line plug.
(Check that the socket lock has been caught at the header lock or In-line plug lock by slightly pulling a cable by hand.)
To remove the socket, refer to 3-2. Socket removal.

3-2. Socket removal

1 3-2-a. Removal:

For straight type

While grasping the cable, use your entire finger to firmly release the lock and remove it.

Attention. If you remove the lock while it is caught, you will not be able to remove it properly.

Fig. 7. Socket removal

For right angle type

While grasping the side of the crimp socket or the cable, make sure to release the lock with your entire finger and remove it.

Attention. If you remove the lock while it is caught, you will not be able to remove it properly.

Attention. When grasping the cable, do not route it in a way that puts stress on the base.

4. Precautions

- Do not insert or remove the socket while electrifying.
- Do not pull the lock as shown below. The lock may be damaged.

Fig. 8. Prohibited uses (Unmating state)

Excessive external force applied to connectors could cause fault or damage.

Please be careful not to route the cable in a way that puts a load on the base of the cable, as shown in the diagram below.
