SPECIFICATIONS								
ITEM	TEST METHOD	REQUIREMENTS	QT	АТ				
Solderability	Soldered at solder temperature 245±3°C, for immersion duration 3±0.3 sec.	A new uniform coating of solder shall cover a minimum of 95% of the surface being immersed.	×	ı				
Resistance to soldering heat	<ol> <li>Reflow soldering:         peak tmp. 250°C MAX.         reflow tmp. over 230°C within 60 sec.</li> <li>Soldering irons:         tmp. 350±10°C for 5±1 sec.</li> </ol>	No case-deformation and loose contacts. (note 4)	×	-				

## (note1)

This connector is back flip lock type, and top/bottom both contact points are available.

## (note2)

Do not close the actuator before inserting FPC even after the connector is mounted onto a PCB.

Closing the actuator without FPC could make the contact gap smaller, which increases the FPC insertion force.

## (note3)

If pull-up or pull-down force is exepected to be applied to the FPC, stabilize the FPC into PCB or other fixed components.

## (note4)

Blisters which may be generated on the housing do not affect product performance.
