- NOTES
- The dimension in parentheses are for reference.
 - Lead co-planarity including reinforced chucking metals shall be 0.1 max.
 - To be delivered with tape and reel packages.
 - Note that preventive hole for sink mark or slit could be added for improvement.
 - The quality remains good, even with the dark spots, which could occasionally occur on molded plastic.
 - This product satisfies halogen free requirements defined as 900ppm maximum chlorine, 900ppm maximum bromine, and 1500ppm maximum total of chlorine and bromine.
 - Shows hook part of the chucking metal.

Technical drawing of a contact assembly. The drawing shows a series of vertical contact fingers. Dimensions are provided for various parts:

- Overall width: 0.25 ± 0.02
- Width of the first contact finger: 0.1 ± 0.02
- Width of the second contact finger: 0.1 ± 0.02
- Width of the third contact finger: 0.24 ± 0.03
- Width of the fourth contact finger: 0.1 ± 0.02
- Width of the fifth contact finger: 0.1 ± 0.02
- Width of the sixth contact finger: 0.1 ± 0.02
- Width of the seventh contact finger: 0.1 ± 0.02
- Width of the eighth contact finger: 0.1 ± 0.02
- Width of the ninth contact finger: 0.1 ± 0.02
- Width of the tenth contact finger: 0.1 ± 0.02
- Width of the eleventh contact finger: 0.1 ± 0.02
- Width of the twelfth contact finger: 0.1 ± 0.02
- Width of the thirteenth contact finger: 0.1 ± 0.02
- Width of the fourteenth contact finger: 0.1 ± 0.02
- Width of the fifteenth contact finger: 0.1 ± 0.02
- Width of the sixteenth contact finger: 0.1 ± 0.02
- Width of the seventeenth contact finger: 0.1 ± 0.02
- Width of the eighteenth contact finger: 0.1 ± 0.02
- Width of the nineteenth contact finger: 0.1 ± 0.02
- Width of the twentieth contact finger: 0.1 ± 0.02
- Width of the twenty-first contact finger: 0.1 ± 0.02
- Width of the twenty-second contact finger: 0.1 ± 0.02
- Width of the twenty-third contact finger: 0.1 ± 0.02
- Width of the twenty-fourth contact finger: 0.1 ± 0.02
- Width of the twenty-fifth contact finger: 0.1 ± 0.02
- Width of the twenty-sixth contact finger: 0.1 ± 0.02
- Width of the twenty-seventh contact finger: 0.1 ± 0.02
- Width of the twenty-eighth contact finger: 0.1 ± 0.02
- Width of the twenty-ninth contact finger: 0.1 ± 0.02
- Width of the thirtieth contact finger: 0.1 ± 0.02
- Width of the thirty-first contact finger: 0.1 ± 0.02
- Width of the thirty-second contact finger: 0.1 ± 0.02
- Width of the thirty-third contact finger: 0.1 ± 0.02
- Width of the thirty-fourth contact finger: 0.1 ± 0.02
- Width of the thirty-fifth contact finger: 0.1 ± 0.02
- Width of the thirty-sixth contact finger: 0.1 ± 0.02
- Width of the thirty-seventh contact finger: 0.1 ± 0.02
- Width of the thirty-eighth contact finger: 0.1 ± 0.02
- Width of the thirty-ninth contact finger: 0.1 ± 0.02
- Width of the fortieth contact finger: 0.1 ± 0.02
- Width of the forty-first contact finger: 0.1 ± 0.02
- Width of the forty-second contact finger: 0.1 ± 0.02
- Width of the forty-third contact finger: 0.1 ± 0.02
- Width of the forty-fourth contact finger: 0.1 ± 0.02
- Width of the forty-fifth contact finger: 0.1 ± 0.02
- Width of the forty-sixth contact finger: 0.1 ± 0.02
- Width of the forty-seventh contact finger: 0.1 ± 0.02
- Width of the forty-eighth contact finger: 0.1 ± 0.02
- Width of the forty-ninth contact finger: 0.1 ± 0.02
- Width of the fiftieth contact finger: 0.1 ± 0.02
- Width of the fifty-first contact finger: 0.1 ± 0.02
- Width of the fifty-second contact finger: 0.1 ± 0.02
- Width of the fifty-third contact finger: 0.1 ± 0.02
- Width of the fifty-fourth contact finger: 0.1 ± 0.02
- Width of the fifty-fifth contact finger: 0.1 ± 0.02
- Width of the fifty-sixth contact finger: 0.1 ± 0.02
- Width of the fifty-seventh contact finger: 0.1 ± 0.02
- Width of the fifty-eighth contact finger: 0.1 ± 0.02
- Width of the fifty-ninth contact finger: 0.1 ± 0.02
- Width of the sixtieth contact finger: 0.1 ± 0.02
- Width of the sixty-first contact finger: 0.1 ± 0.02
- Width of the sixty-second contact finger: 0.1 ± 0.02
- Width of the sixty-third contact finger: 0.1 ± 0.02
- Width of the sixty-fourth contact finger: 0.1 ± 0.02
- Width of the sixty-fifth contact finger: 0.1 ± 0.02
- Width of the sixty-sixth contact finger: 0.1 ± 0.02
- Width of the sixty-seventh contact finger: 0.1 ± 0.02
- Width of the sixty-eighth contact finger: 0.1 ± 0.02
- Width of the sixty-ninth contact finger: 0.1 ± 0.02
- Width of the seventieth contact finger: 0.1 ± 0.02
- Width of the seventy-first contact finger: 0.1 ± 0.02
- Width of the seventy-second contact finger: 0.1 ± 0.02
- Width of the seventy-third contact finger: 0.1 ± 0.02
- Width of the seventy-fourth contact finger: 0.1 ± 0.02
- Width of the seventy-fifth contact finger: 0.1 ± 0.02
- Width of the seventy-sixth contact finger: 0.1 ± 0.02
- Width of the seventy-seventh contact finger: 0.1 ± 0.02
- Width of the seventy-eighth contact finger: 0.1 ± 0.02
- Width of the seventy-ninth contact finger: 0.1 ± 0.02
- Width of the eightieth contact finger: 0.1 ± 0.02
- Width of the eighty-first contact finger: 0.1 ± 0.02
- Width of the eighty-second contact finger: 0.1 ± 0.02
- Width of the eighty-third contact finger: 0.1 ± 0.02
- Width of the eighty-fourth contact finger: 0.1 ± 0.02
- Width of the eighty-fifth contact finger: 0.1 ± 0.02
- Width of the eighty-sixth contact finger: 0.1 ± 0.02
- Width of the eighty-seventh contact finger: 0.1 ± 0.02
- Width of the eighty-eighth contact finger: 0.1 ± 0.02
- Width of the eighty-ninth contact finger: 0.1 ± 0.02
- Width of the ninetieth contact finger: 0.1 ± 0.02
- Width of the ninety-first contact finger: 0.1 ± 0.02
- Width of the ninety-second contact finger: 0.1 ± 0.02
- Width of the ninety-third contact finger: 0.1 ± 0.02
- Width of the ninety-fourth contact finger: 0.1 ± 0.02
- Width of the ninety-fifth contact finger: 0.1 ± 0.02
- Width of the ninety-sixth contact finger: 0.1 ± 0.02
- Width of the ninety-seventh contact finger: 0.1 ± 0.02
- Width of the ninety-eighth contact finger: 0.1 ± 0.02
- Width of the ninety-ninth contact finger: 0.1 ± 0.02
- Width of the hundredth contact finger: 0.1 ± 0.02

In case of consideration for using Automotive equipment / device which demand high reliability, kindly contact our sales window correspondents.

This connector features small and thin, requiring delicate and careful handling.
To prevent connector/FPC breakage and contact failure (mating failure, FPC pattern breakage, etc),
read through the instructions shown below and handle the connector properly.

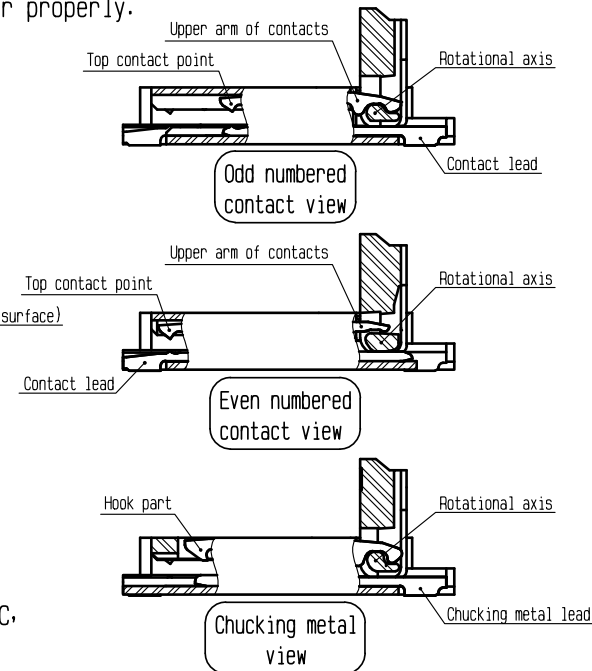

[Connector Part Nomenclature]

Top view

Front view

[Operation and Precautions]

1. Initial condition

Actuator does not have to be operated before inserting FPC,
as the connector is delivered with the actuator opened.

[Caution]

- Do not close the actuator before inserting FPC.
Closing the actuator without FPC could make the contact
gap smaller, which could increase the FPC insertion force. (Example1)
- Do not insert FPC or operate actuator before mounting. (Example1)

- Open when delivered -

Example1

- Incorrect operation -

2. How to insert FPC

Insert the FPC into the connector opening horizontally to the PCB plane.
Insert it properly to the very end. (Example2)

[Caution]

- Do not insert the FPC with the actuator closed. (Example3)
- Do not twist the FPC to up and down, right and left or an angle. (Example4)

Example2

- Correct operation -

Actuator open

- Correct operation -

Align both sides of FPC horizontally to the sides of
the connector opening and insert straightforward.

Example3

- Incorrect operation -

Example4

- Incorrect operation -

3. FPC insertion check

Make sure that the FPC tabs are located in proper position as shown in the figure below after FPC insertion. (Example5)

[Caution]

- Do not insert the FPC at an angle and/or stop it before insertion is completed. (Example6)(Example7)

Example5

- Correct assembled -

Example6

- Incorrect assembled -
(Insufficiently inserted)

Example7

- Incorrect assembled -
(Angle insertion)

4. How to lock

The actuator rotates around the rotational axis as shown below.
Apply load to rotate the actuator by 90 degree after inserting the FPC. (Example8)

[Caution]

- To close the actuator, operate at the center of the actuator. (Example9)
- To close the actuator, do not operate the actuator at one end only. (Example10)
- The actuator rotates 90 degrees max. Do not try to rotate the actuator further towards the opening direction or apply any extra force to the actuator while it is fully open. (Example11)
- Do not apply extra force to the connector while rotating the actuator as the illustration shows. (Example 12.13)
- Do not operate the actuator while the upper contact arm is pressed down. (Example14)
- Do not pick the actuator to lift. (Example15)
- Operate the actuator by hand without using sharp tool such as Tweezers. (Example16)
- Do not apply excess force to the housing during the operation. (Example17)

Example8 Actuator movable range
(Side view)

Example9

Close the actuator at the center

- Correct operation -

Example10

Do not operate the actuator
at one end only

- Incorrect operation -

Example11

- Incorrect operation -

Actuator receives inappropriate
force in reverse direction.

Example12

- Incorrect operation -

Example13

- Incorrect operation -

Example14

- Incorrect operation -

Example15

- Incorrect operation -

Example16

- Incorrect operation -

Example17

Do not apply excess force
to the housing during the operation.

- Incorrect operation -

5. Mating confirmation of the FPC

Visually confirm the FPC positioning after closing the actuator. (Example18)

[Caution]

- Do not insert the FPC at an angle and/or stop it before insertion is completed. (Example19)(Example20)

Example18

- Correct assembled -

Example19

- Incorrect assembled -
(Insufficiently inserted)

Example20

- Incorrect assembled -
(Angle insertion)

6. How to unlock

Slowly flip up the actuator to release the lock. (Example21)

[Caution]

- To open the actuator, operate at the center of the actuator. (Example22)
- To open the actuator, do not operate the actuator at one end only. (Example23)
- The actuator rotates 90 degrees max.
Do not try to rotate the actuator further towards the opening direction or apply any extra force to the actuator while it is fully open. (Example24)
- Open the actuator right above.
Do not attempt to open further or to open it by applying horizontal force as this may cause its damage. (Example25)
- Do not pick the actuator to lift. (Example26)
- Operate the actuator by hand without using sharp tool such as Tweezers. (Example27)
- Do not apply excess force to the housing during the operation. (Example28)
- Please note that the connector is back flip style connector,
and the opening for FPC insertion and the actuator face the opposite direction.
Do not try to lift the actuator at the FPC insertion opening side. (Example29)

7. How to remove FPC

After rotating the actuator to the fully opened position carefully withdraw the FPC pulling out horizontally. (Example30)

[Caution]

- Do not withdraw the FPC at inclined towards vertical and horizontal angle. (Example31)
- Do not attempt to pull the FPC without unlocking the actuator (Example32).

[Precautions for component layout]

While the FPC is under tension due to the connecting configuration, extra stress may be applied to the connector.

As a result, conduction failure may occur due to the extra stress.

In order to prevent such kind of conduction failure, please read through the following parts before making circuits/mechanism design.

[Caution]

-Avoid applying forces to/pulling the FPC along/perpendicular to the direction of FPC insertion. (Example 33)

-Avoid pushing/pulling the FPC upwards/downwards.

-If the FPC has to be curled/bended in your cabling design,

please keep enough degree of freedom in your design to keep the FPC tension free.

In this regard, the stiffener should be parallel to the PCB. (Example 34)

-If the FPC has to be curled/bended in your cabling design, do not curl/bend the FPC area near the connector.

This may lead to conduction failure or FPC breakage. (Example 35)

It is recommended to keep the FPC fixed to avoid applying stress through the FPC to the connector.

-Do not mount other components underneath the FPC stiffener which may interfere with the connection. (Example 36)

-Follow the recommended FPC design.

Please consult with the FPC manufacturer about FPC bending performance and wire breakage strength while making design.

-Keep sufficient operating space for FPC insertion during layout design in order to avoid incorrect FPC insertion.

Please keep enough FPC length and component layout space for assembly during design process.

FPC with too short length may make the assembly difficult.

-Keep enough space for the rotation of the actuator during PCB and component layout design.

-Please consult with our sales representative if you are using FPC with different configuration from our recommendation.

[Instructions for mounting on the PCB]

Follow the instructions shown below when mounting on the PCB.

[Caution]

- Refer to recommended layouts on page 1 for PCB and stencil pattern.
- Using either narrower land pattern or wider stencil pattern than recommendation may end up with excessive amount of solder/flux climbing on contact.
Please inspect the size of solder fillet and flux climbing height of the mounted connector while using different land/stencil pattern from our recommendation.
- Clearance between the mounting surface of the connector contact lead and the bottom of the housing is very small. Solder resist/silk screening applied underneath the connector may interfere with the connector. This may lead to soldering defect/insufficient fillet formation.
Please verify your solder resist/silk screening design carefully before implementing the design.
- Please try to minimize the warpage of the PCB. Soldering failure could still occur due to the PCB warpage even if the coplanarity of the connector is under 0.1mm.
- If the connector is mounting on FPC, please make sure to put a stiffener on the backside of the FPC.
Recommended stiffener: Glass epoxy material with thickness of 0.3 mm MIN.
- Do not apply 0.5 N or greater external force on the connector when unreeling or handling the connector before mounting.
Excessive mechanical stress may damage the connector before mounting.
- Apply reflow temperature profile within the specified conditions.
For specific applications, the recommended temperature may vary depending on type/ volume/thickness of solder paste and size/thickness of PCB.
Please consult with your solder paste and equipment manufacturer for specific recommendations.
The temperatures mentioned below refer to the PCB surface temperature near the connector contact leads.
- Reflow method:IR reflow
- Number of reflow cycles:2 cycles MAX.

[Instructions for PCB handling after mounting the connector]

Follow the instructions shown below when mounting on the PCB.

[Caution]

- Splitting a large PCB into several pieces
- Installing mounting screw on PCB
During the assembly processes described above, care shall be taken so as not to give any stresses of deflection or twisting to the PCB. Stresses applied on PCB may damage the connector as well.
- The warpage of a 100 mm wide PCB should remain within 0.5 mm .(Example 37)
The warpage of PCB may apply excessive stress on the connector and damage the connector.

[Instructions on manual soldering]

Follow the instructions shown below when soldering the connector manually during repair work, etc.

[Caution]

- Do not perform manual soldering with the FPC inserted into the connector.
- Do not heat the connector excessively. Be very careful not to let the soldering iron contact any parts other than connector leads. Otherwise, the connector may be deformed or melt.
- Do not supply excessive solder (or flux).
- If excessive solder (or flux) is supplied on the contact lead, solder or flux may adhere to the contact point or rotating parts of the actuator, resulting in conduction failure or a rotation failure of the actuator. Supplying excessive solder to the chucking metals may hinder actuator rotation, resulting in breakage of the connector.

[Others]

- Attachment of foreign particles with the connector contact may lead to conduction failure.(Example 38)
In this particular case, the conduction failure may be fixed by re-inserting the FPC.
- Please perform conduction check with caution. Conductivity probe may damage the connector contacts.

Example 38)

- Incorrect operation -
