

DF14 Series

# 1.25mm Pitch, Low Profile Crimp Connector

Low Profile

Right Angle

Wide Variation

## Features

### 1. Low Profile

DF14 is a right angle connector that enables a low profile on the board. Signals can be routed in places where there is no space between boards using DF14. The on-board type, DF14(A), has a board mounted height of 2.5mm. The offset type, DF14H, has an even lower profile with a board mounted height of 1.6mm.

DF14H Offset Type Board Mounted Diagram

### 2. Pick & Place Mounting

The header has a vacuum suction surface and embossed tape packaging for pick & place mounting.

Additionally, tube packaging is available for the on-board type.

### 3. Four-wall Design

The box-shaped header prevents prying and mis-insertion. The walls on the header prevent issues resulting from friction to the board caused by the socket. Retention tabs are added to prevent solder peeling.

## Applications

LCD (crystal panel), Note PCs, PDAs, Small Office Equipment, Video Devices and other Consumer Products.

## Product Specifications

Rated Current	1A/pin	Operating Temperature (Note 1)	-35 to +85°C
		Operating Humidity Range (Note 2)	40 to 80%
Rated Voltage	150V AC/DC	Storage Temperature Range (Note 3)	-10 to +60°C
		Storage Humidity Range (Note 3)	40 to 70%

Note 1 : Includes temperature rise due to current flow.

Note 2 : Please use without condensation.

Note 3 : Applicable to unused items in packaged state.

Item	Specification	Condition
Insulation Resistance	500M $\Omega$ Min.	100V DC
Withstanding Voltage	No flashover or insulation breakdown.	500V AC per min.
Contact Resistance	30m $\Omega$ Max.	Measured at 20mV or less, 1mA (DC or 1000Hz)
Insertion/ Extraction Force	0.15N Min. (15gf), 3N Max. (300gf)	Measured with 0.3 <sup>+0.005</sup> <sub>0</sub> mm square pin
Vibration Resistance	No electrical discontinuity of 1 $\mu$ s or more	Frequency : 10 to 55Hz, single amplitude of 0.75mm, 2 hours in each of the 3 directions.
Humidity (Steady State)	Contact resistance : 30m $\Omega$ Max. Insulation resistance : 500M $\Omega$ Min.	96 hours at temperature of 40 $\pm$ 2°C and humidity of 90% to 95%
Temperature Cycle	Contact resistance : 30m $\Omega$ Max. Insulation resistance : 500M $\Omega$ Min.	(-55°C : 30 minutes $\rightarrow$ 5 to 35°C : 2-3 minutes $\rightarrow$ 85°C : 30 minutes $\rightarrow$ 5 to 35°C : 2-3 minutes) 5 cycles
Mating Durability	Contact resistance : 30m $\Omega$ Max.	Tin Plating : 30 cycles Gold Plating : 50 cycles
Soldering Heat Resistance	No deformation of components affecting performance.	SMT Type Reflow : At the recommended temperature profile Manual soldering : 350°C for 3 seconds

Note 1 : Please perform crimping work based on the crimping quality standard (ETAD-H0819-00) and crimping condition table.

Note 2 : The warranty does not cover problems caused by tools other than those specified by us.

Note 3 : For manual crimping tools, the reel terminals are cut continuously.

## Crimping Precautions

### ■ Items Required Prior to Crimping

The work-related documents shown below are required before starting harness assembly.

( The ● mark represents required documents. )

Please contact your Hirose sales representative if you do not have these documents.

Document Title	Description	Automatic Crimping	Hand Crimping	Remarks
Crimping Machine Main Unit Instruction Manual	Explanation of main press unit	●	—	Bundled with purchase of main press machine unit.
Applicator Instruction Manual	Crimp Method	●	—	Bundled with purchase of applicator.

Crimp Quality Standards	Various standards for crimping conditions	●	—	
Hand Tool Operating Instructions	Crimp method, crimp height and tensile height standard value	—	●	Bundled with purchase of hand tool.
Cable Assembly	Cable assembly	●	●	Contact a Hirose sales representative.

### ■ Tools

- Use tools designated by Hirose when crimping.
- Crimping performed using tools other than those specified is outside the scope of warranty.
- The operating instructions are available for the crimping machine and the applicator. Be sure to carefully read the operating instructions manual before beginning work.

## ■ Applicable Cables

Check that the cables to be used are within the applicable range.

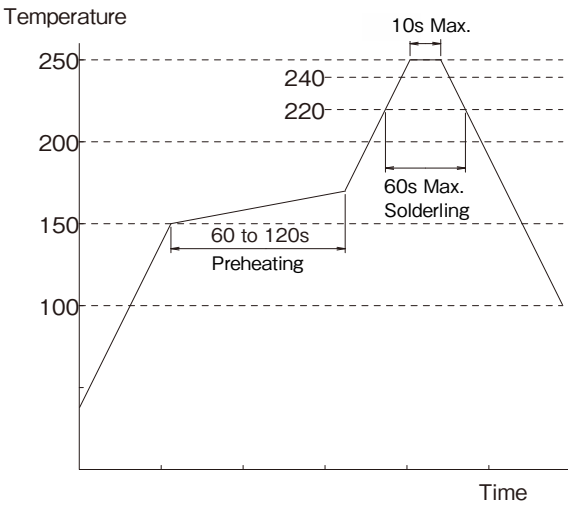

If you intend to use a cable other than those recommended, contact a sales representative.

### [Precautions]

- Cables applicable to crimping connectors are tin- plated stranded soft- copper wire.
- Avoid crimping solid wire, wires with polyester threads or tin coated wires.
- Avoid crimping two cables together.
- The crimp height setting values (Note 1) may vary between tin- plated and gold- plated terminals even if the same electric wires are used.
- The crimp height setting values (Note 1) may vary depending on the difference in the core wire configuration even if the computed cross- sectional area is the same.

Note 1 : The crimp height is an important item that determines crimping quality. We execute crimping tests for each electric wire to ensure the optimal value for the crimp height with high precision, thereby ensuring optimal setup values.

5. Cleaning Conditions	Refer to "Wire-to-Board Connector Use Handbook."						
6. Termination Conditions	Refer to "Wire-to-Board Connector Use Handbook." ■ Crimp contacts are small, so please make sure to perform crimping based on the instructions in the "Crimping Conditions" and "Crimping Quality Standards".						
7. Cautions	■ Excessive prying during mating and unmating may result in damage. For details, refer to the "Instruction Manual".						
8. Handling	Please refer to the following documents when handling the product. ■ Crimp Quality Standard (ETAD-H0819-00) ■ Wire-to-Board Connector Use Handbook						

## ■ Precautions During Insertion

### ● Handling

Method : Lightly grasping the base of the cable, press the connector with your finger and insert it.

### ● Insertion Angle

[Caution] Do not insert at an angle of 30° or greater. Doing so will cause contact deformation or case damage.

Method : Insert with the connector parallel to the board.

## ■ Precautions During Disconnection

### ● Handling

Method : Grasp the cable so that it held evenly and pull out.

### ● Removal Angle

[Caution] Do not remove at an angle of 30° or greater. Doing so will cause contact deformation or case damage.

Method : Remove with the connector parallel to the board.

## While taking in consideration

Specifications mentioned in this catalog are reference values.

When considering to order or use this product, please confirm the "Drawing" and "Product Specifications" sheets.

Use an appropriate cable when using the connector in combination with cables.

If considering usage of a non-specified cable, please contact your sales representative.

If assembly process is done by jigs & tools which are not identified by Hirose assurance will not be given.

Please consult with your Hirose sales representative if you are planning to use the product for any of the following applications. (Automotive, medical, public infrastructure, aerospace/defense, etc.)

Hirose will consider the validity of the warranty depending on the conditions.
