

Automotive High Voltage Waterproof Connector

HVH-280 Series (Waterproof)

● Low Profile and Small Size

Fig.1

■ Features

1. **Rated current : 30A**
Rated voltage : 600V AC/DC

2. **Low profile and small size**

Miniaturization by using two screws greatly reduces the mounting area. Rated current is 30A with a 40% height reduction compared to competitive products.

3. **High Heat Resistance**

Ambient temperature up to 120°C.

4. **High Vibration Resistance**

Can be used in severe environments such as inside vehicles where strong vibration is present.

5. **IPXXB (finger protection)**
(Compliant with JIS C0920)

6. **IPX9K (high pressure washing)**
waterproof (Compliant with JIS D 5020)

Suitable for harsh high pressure washing environments such as an interface connector for automobiles and industrial equipment.

7. **Reinforced EMI Prevention**

The metal shield and ground provide complete EMI protection.

8. **CPA (Half-Fit Prevention Mechanism)**

The use of a CPA (Connector Position Assurance) mechanism ensures a secure fit and prevents malfunctions due to poor mating.

9. **Mating Detection Circuit**

A mating detection circuit ensures worker safety. The connector is designed so that no current flows to the power terminal unless the detection circuit's signal terminal contacts it (interlock mechanism) to prevent electric shocks.

*When using the interlock mechanism, it is necessary for the customer to build the circuit.

● Mating Detection Circuit

When the power terminal comes into contact, no current flows through the detection signal terminal.

● EMI Prevention

Noise is transmitted through a metal shield to the panel, creating effective shielding.

◆Usage Precautions

1. Pulling out the connector with force may result in damage. If it is difficult to pull out, lightly push it once and then operate the lock to pull it out.
2. When inserting or extracting the terminal, always disconnect from the power source first.
3. Do not touch the terminals while the power is on since it is very dangerous.
4. Contact a sales representative for harness instructions and handling manuals.
5. Do not perform insertion or extraction with a live wire. (Live wire insertion/extraction refers to inserting/extracting while electricity is running)

◆Usage Environment

Please consult with your Hirose Electric sales representative if your system environmental conditions repeat high and low temperatures.
