1. **Scope**
   This document specifies the steps from crimping the DF62-series crimped terminals to cables (AWG22 ~ AWG30) to inserting the terminals to crimping sockets.

2. **Connectors**
   - Crimping cases
     **DF62 - ± EP - 2.2 C**
     1  2  3  4  5
     1 Name: DF62
     2 No. of poles: 2 ~ 24 ▲
     3 Connector types
        S: Socket
        EP: In-line plug
     4 Contact pitch: 2.2 mm
     5 Shape of connection/terminal
       C: Crimping case
   - Crimped terminals
     **DF62 - EP 2428 PCF A**
     1  2  3  4
     1 Application
        EP: In-line
     2 Compatible cables
        22: AWG22
        2428: AWG24 ~ 28
        30: AWG30
     3 Shape/packing
        SCF: Socket terminal, reeled
        SC: Socket terminal, separate
        PCF: Plug terminal, reeled
        PC: Plug terminal, separate
     4 Plating
        A: Gold plating
        Blank: Tin plating ▲

3. **Steps for harnessing**

3.1. **Cable stripping**
Strip cables in accordance with Crimping Quality Standards (ATAD-H0642/0643). In so doing, make sure there is no scratch on cable cores.
3.2. Crimping
Crimp terminals to cables using an applicator (AP105-DF62-**), and check the crimping height and shape in accordance with the Table of crimping conditions and Crimping Quality Standards (ATAD-H0642/0643).

(*) = 22, 2428 or 30

3.3. Insertion to crimping terminal sockets
Hold the cable of a crimped terminal, and insert it to each terminal hole of crimping sockets.

(Insert the terminal in the direction of arrows below.)

⚠️ The figures show insertion to DF62B-2EP-2.2C and DF62B-2S-2.2C.

- For insertion, place the crimped terminal lance and crimping case lock in the following direction:
• See below for the terminal numbers of crimping cases:

⚠️ terminal numbers (Common to socket and in-line plug)

- Terminal No. 1
- Terminal No. 2
- Terminal No. 3
- Terminal No. 4
- Terminal No. 5
- Terminal No. 6
- Terminal No. 7
- Terminal No. 8
- Terminal No. 10
- Terminal No. 11
- Terminal No. 12
- Terminal No. 13
- Terminal No. 15
- Terminal No. 16
- Terminal No. 20
- Terminal No. 21
- Terminal No. 24

• To maintain performance reliability, do not tilt crimped terminals for insertion.

Horizontal insertion ○

Tilted insertion ×
Check how terminals have been inserted

- Check that the lance of a crimped terminal has been caught at the lance holder of the crimping case.
  (Slightly pull the terminal to check.)
*Repair crimped terminals
To remove crimped terminals that have been inserted, pull the cable using the dedicated removing jig while pushing up the crimped terminal lance.

4. **Precautions for handling**

*Packing and storage
To pack or store assemblies, make sure overlapped connectors will not apply extreme load to the lock section.
If load is applied to the lock section under high temperature and humidity for a long period of time, the lock section will be deformed which could lead poor fitting.
