Features

1. **Ultra low-profile structure**
   A low-profile and space-saving item, with a stacking height of 0.7mm (0.8mm MAX).

2. **Reliable electrical and mechanical connection**
   Despite its small mated height, unique contact configuration assures highly reliable connection, with effective mating length of 0.5mm. (fig. 1)

3. **Enhanced shielding and ground connections**
   Metal shells on the plug and receptacle connect to each other, assuring reliable ground connection and EMC protection.

4. **Simplified lock structure with audible click**
   Audibly clicks into place thanks to the two-point lateral lock structure and optimized contact force.

5. **Incorrect insertion prevention mechanism**
   The bend structure of the shell prevents the reverse insertion of the plug connector and mating failure. (fig. 2)

6. **Solder wicking prevention**
   Nickel barriers prevent solder wicking in the critical contact areas. (Receptacle)

7. **RoHS, Halogen-free**
   *As defined by IEC61249-2-21
   Br-900 ppm maximum, Cl-900 ppm maximum, Cl+Br combined-1,500 ppm maximum

Connectors for conductivity tests

We have a line-up of plug connectors for inspection, usable for electrical testing.

<tr>
<td>7. Durability</td>
<td>Contact resistance (change from initial value) 50 mΩ max.</td>
<td>30 cycles</td>
</tr>
<tr>
<td>8. Resistance to soldering heat</td>
<td>No deformation of affecting performance</td>
<td>Reflow: At the recommended temperature profile Manual soldering: 350°C for 3 seconds</td>
</tr>
</tbody>
</table>

**Note 1:** Includes temperature rise caused by current flow.

**Note 2:** The term "storage" refers to products stored for a long period prior to mounting and use. The operating temperature and humidity range covers the non-conducting condition of installed connectors in storage, shipment or during transportation after board mounting.

**Note 3:** With only the connector portion at an elevated temperature level, the rated current value is set.

### Combinations

#### [Standard use]

DF49-*S-0.4H(**) + DF49-*P-ASSY

- DF49-*P-0.4SD(**)
- DF49-*P-SHL

Note: The product specification of the above combination is shown on page 2.

#### [Receptacle conductivity test]

DF49-*S-0.4H(**) + DF49J-*P-ASSY (Note)

- DF49J-*P-0.4SD(**)
- DF49J-*P-SHL

Note: This harness item is only usable for the receptacle test. For the product specification of the above combination, please contact our sales department.

#### [Plug conductivity test]

DF49-*S-0.4H(**) + DF49-*P-ASSY

- DF49-*P-0.4SD(**)
- DF49-*P-SHL

Note: For the product specification, please contact our sales department.

*: ASSY means a harness item.

<tbody>
<tr>
<td>Room temperature</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Solder composition: Paste, 96.5%Sn/3.0%Ag/0.5%Cu

Note 1: Up to 2 cycles of Reflow soldering are possible under the same conditions, provided that there is a return to normal temperature between the first and second cycle.

Note 2: The temperature profile indicates the board surface temperature at the point of contacts with the connector terminals.

2. Recommended manual soldering

Manual soldering: 350°C for 3 seconds
Do NOT use flux compound when manual soldering.

3. Recommended screen thickness and open area ratio (Pattern area ratio)

<table>
<thead>
<tr>
<th>Standard thickness 0.1mm</th>
<th>Lead terminal 100%</th>
<th>Ground terminal 75%</th>
</tr>
</thead>
</table>

4. Board warpage

Maximum of 0.02mm at the connector center, with both ends of the connector as reference points.

5. Cleaning conditions

Refer to “Nylon Connector Use Handbook”.

Extraction tool

For details about the extraction tool, please contact your Hirose sales representative.
Mating / un-mating

Please work according to the following operational procedure:

① Confirmation of insertion direction

Upon insertion, please check the front and rear of the connector at the cable side.
On the front side, the △ mark, HRS mark and the display of the pole number are stamped.

② Confirmation of temporary insertion

Please lay the plug into the receptacle gently and insert up to the temporary insertion position.
* If inserted up to the temporary insertion position, the connection can be correctly ensured.

③ Confirmation of insertion

From the temporary insertion position, please push on both sides of the plug simultaneously and with equal force, to confirm the insertion.
## Precautions

### un-mating

Use a dedicated extraction tool to un-mate the plug. Insert the tool under either end of the plug and pull as illustrated below.

1. Insert the tool under either end of the plug.
2. Pull out the plug (for the horizontal direction).
3. Finish

- Do not mate / un-mate the connectors when receptacle is not mounted on the board.
- In the manual soldering process, don’t carry out the flux coating which will cause a flux blister on the connector.
- Excessive scoop insertion or extraction may result in damage.
