Features

1. Small-sized connector
   0.8mm Pitch, 1.75mm Height, 4.1mm Depth. Suitable for small-sized applications.

2. Small but robust structure
   The housing is designed with thick walls while remaining small. This produces a strong, robust connector that resists damage.

3. Suitable for high current applications.
   The maximum current of 2.5A (using 2-pos 28 AWG wire) is achieved by using highly conductive material and appropriate contact force.

4. BOX shaped contact prevents deformation.
   The BOX shaped crimp contact prevents deformation during assembly and contributes to the overall stability and robustness.

5. Visual check insures fully mated Plug and Receptacle
   The housing is designed with an open side that allows for visual inspection to insure the connectors are fully mated preventing accidental disconnect.

6. Glow Wire compliance (Compliant with IEC 60695-2-11)

7. Halogen-free
   Chlorine and bromine levels are below standard values of IEC 61249-2-21.
   Br: less than 900ppm, Cl: less than 900ppm,
   Br + Cl: less than 1,500ppm.

**Note 1:** Includes the temperature rise caused by current flow.

**Note 2:** Use in environments without condensation.

**Note 3:** The term "storage" refers to the long-term storage condition of unused products before PCB mounting. Operating temperature/humidity range is applied to the deenergized state after mounting of PCB and the temporary storage state during transportation.

## Product Number Structure

Refer to the chart below when determining the product specifications from the product number. Please select from the product numbers listed in this catalog when placing orders.

### Receptacle

**DF 52 - * S - 0.8 H**

- **Series name:** DF
- **Series No.:** 52
- **Number of contacts:** 2, 3, 4, 5, 6, 8, 10, 12, 14, 15, 16, 17, 20
- **Connector type:** S: Receptacle
- **Contact Pitch:** 0.8mm
- **Termination style:** H: SMT Right Angle Type

### Plug connector

**DF 52 - * P - 0.8 C**

- **Series name:** DF
- **Series No.:** 52
- **Number of contacts:** 2, 3, 4, 5, 6, 8, 10, 12, 14, 15, 16, 17, 20
- **Connector type:** P: Crimping plug
- **Contact Pitch:** 0.8mm
- **Termination style:** C: Crimping plug

### Crimp contact

**DF 52 - 2832 PCF**

- **Series name:** DF
- **Series No.:** 52
- **Applicable wire size:** 2832 28 to 32 AWG
- **Method type/Packaging type:** PCF: Plug crimp contact, reel
Right angle receptacle

Unit : mm

Recommended PCB layout

Packaging Specification

●2 to 17 pos.

●20 pos.

Style of reel
**DF52 Series**

*0.8mm Pitch, Compact and Robust Wire-to-Board Connectors*

Note 2: Applicator manufactured by JAPAN AUTOMATIC MACHINE (J.A.M.). Please access to HP of J.A.M., if you make inquiries about the applicator or crimp defect. (URL: http://www.jam-net.co.jp)

Precautions

1. Recommended Temperature Profile (Compatible with lead-free soldering)

   ![Temperature Profile Diagram]

   [Applicable Conditions]
   1. Peak temperature : 250°C max.
   2. Heating area : 220°C min. for less than 60 seconds
   3. Preheating area : 150°C to 180°C for 90 to 120 seconds
   4. Number of times : no more than 2 times
      
      Measurement is conducted at the contact lead part
      
      Soldering results may change depending on conditions such as solder paste type, manufacturer, PCB size, and other soldering materials. Please determine all mounting conditions before use.
      
      Note 1: This temperature profile is a recommended value.

2. Recommended manual soldering conditions

   Temperature of soldering iron : 350±10°C, soldering time : within 3 seconds

3. Recommended screen thickness and aperture ratio (Pattern surface ratio)

   Thickness : 0.1mm, aperture opening ratio : 100%

4. Warpage of the Board

   A maximum of 0.02mm at the center of connector, as measured from either end of the connector

5. Cleaning Conditions

   IPA cleaning is allowed. (Cleaning is not recommended due to potential changes in mating action and other variables. Please contact us if you use other cleaning agents.)

6. Noteworthy Points

   ■ Please note that any mating operation of the connector when not mounted on the board may cause damage or deformation of the contacts.
   ■ During hand soldering, do not apply flux, as it will flow over the connector.
   ■ This housing color may have slight variations depending on the production lot. This color variation does not affect performance.
   ■ Please refer to “DF52 mating and unmating Procedure Document (ETAD-H0788)” for points in handling regarding mating operations.
   ■ Please refer to “Harness procedure manual (ETAD-H0791)” for points in harness operations.
