## Features

1. **Simplified assembly**
   - The crimp contact itself becomes the connector in a few simple steps by crimping the contact directly to the power cable and then inserting it into the housing.

2. **Quick, snap in lock**
   - Its snap-in structure reduces assembly costs due to its simplicity and ability to reduce wiring steps. This connector does not need screws like traditional terminal block connectors.

3. **160A rated current capacity when using 38mm² cable**
   - Supports 5.5, 8, 14, and 22mm² cables by utilizing a sleeve to convert the conductor diameter to 38mm².

4. **Multiple mounting options**
   - Attached to a DIN rail or secured to a panel, this connector is versatile enough to be used in a wide range of mounting applications.

5. **Simplified crimp terminations**
   - No special tools are required.

6. **Equipped with guide keys**
   - Guide keys are used to prevent incorrect wiring.

7. **Pending TÜV, UL certifications**
   - Testing is underway to get this series qualified for various safety standards.

8. **RoHS compliant**
   - All materials and substances used to produce this product comply with the RoHS compliant standards.

Note: Operating temperature range includes the temperature rise by current carrying.

Note: Units, specifications, and conditions may vary depending on the specific model and application. Always consult the product manual or contact a company representative for the most accurate and up-to-date information.

In cases where the application will demand a high level of reliability, such as automotive, please contact a company representative for further information.
EF1 Series: Simple Assembly In-Line Power Connectors for up to 160A

[Reference] Derating curve and temperature rise curve

Note 1: The derating curve is derived from the basic curve multiplied by the derating factor of 0.8.
Note 2: The value of rated current varies with the ambient temperature. It is recommended to use the product within the derating curve zone.
When using a UL or TÜV approved product, please use the product within the specified range as well as the derating curve area.
Note 3: The measurement method of the derating curve and temperature rise curve is shown below.
  - Test specimen: This product, unused prior to testing.
  - Test cable conductor cross sectional area: 2 AWG (38mm²)
  - Test condition: Power supplied while the specimen is in a stationary state and then measured.

Product Number Structure

Refer to the chart below when determining the product specifications from the product number.
Please select from the product numbers listed in this catalog when placing orders.

**Connector**

EF 1 - 38 R A - 1 S C A (***)

1. Series Name: EF1
2. Contact Structure:
   S = Spring contact side
   P = Non-spring contact side
3. Connector Type:
   P = Plug
   R = Receptacle
   None = Sleeve
4. Serial Symbol
5. No. of Contacts: 1

**Sleeve**

EF 1 - 38 - 22 (***)

1. Contact Termination Method: C = Crimp termination
2. Mating Guide Display: 4 different keying options available from A to D
3. Other specification differences are noted with (01), (02)... to distinguish certain variations.
4. Supported Cables
   22 = Supports an equivalent cable with 22mm² conductor cross section area
   14 = Supports an equivalent cable with 14mm² conductor cross section area
   8 = Supports an equivalent cable with 5.5 and 8mm² conductor cross section area

**Safety Precautions**

- **Warning**
  - Do not touch the exposed conductor while it is energized, failing to follow this warning may cause an electric shock and injury.
  - The power should be in the OFF position when inserting or extracting this connector.
  - After mating this connector, perform a light pull on the cable to ensure that it has been correctly mated and the locking process will hold it in place. If it is not mated correctly, then the cable will be removed. An incomplete mate can cause disconnection, contact failure and a significant danger threat.

- **Caution**
  - This connector was designed to be used in a stable and stationary environment, do not try to operate this connector where vibrations will occur.
  - Please only use Hirose approved contacts, using unapproved contacts can result in a lowering of the product's performance and cause a serious accident. Please contact your local Hirose representative for additional information.
