Features

1. Small mated height and board occupied space
   Small pitch (0.4mm) and mated height (1.5mm) allows use in space-restricted areas.
   Standard type: mated height 1.5mm, depth 4.4mm
   Savings space type: mated height 1.5mm, depth 2.8mm
   Plug: Height 1.33mm, depth 2.8mm

2. Enhanced shielding and ground connections
   Metal covers on the plug and receptacle connect to each other with a reliable multi-point ground contacts, assuring reliable ground connection and EMC protection.

3. Reliable lock
   Fully mated condition is assured with reliable locks at 4 locations, confirming it with a distinct tactile click.

4. Reliable electrical and mechanical connection
   Despite it’s small mated height, unique contact configuration assures highly reliable connection, with effective mating length of 0.4mm.

5. Solder wicking prevention
   Nickel barriers prevent solder wicking in the critical contact areas.

6. Durable plug construction
   Formed metal shells on the top and side surfaces form a strong and rigid assembly.

7. RoHS, Halogen-free*
   *As defined by IEC61249-2-21
   Br-900 ppm maximum, Cl-900 ppm maximum,
   Cl+Br combined-1,500 ppm maximum

Receptacle for conductivity tests
   We have a line-up of connectors for inspection, usable for electrical testing of both standard type and space saving type.

In cases where the application will demand a high level of reliability, such as automotive, please contact a company representative for further information.

### Combinations

#### Standard use

DF36(A)-*S-0.4V(***) + DF36(A)-*P-ASSY

Note: The product specification of the above combination is shown on page 2.

#### Receptacle test

DF36(A)-*S-0.4V(***) + DF36(A)-*P-ASSY

Note: This harness item is only usable for the receptacle test.

For the product specification of the above combination, please contact our sales department.

#### Plug test

DF36(A)-*S-0.4V(***) + DF36(A)-*P-ASSY

Note: This harness item is only usable for the plug test.

For the product specification of the above combination, please contact our sales department.

* ASSY means a harness item.
### Receptacles - Standard, with metal cover

Note 1: Tape and reel packaging (5,000 pcs/reel).
Extraction tool
For details about the extraction tool, please contact your Hirose sales representative.

Usage Recommendations

1. Recommended temperature profile

2. Recommended manual soldering

3. Recommended screen thickness and open area ratio (Pattern area ratio)

4. Board warpage

5. Cleaning conditions

Solder composition: Paste, 96.5%Sn/3.0%Ag/0.5%Cu

Note 1: Up to 2 cycles of Reflow soldering are possible under the same conditions, provided that there is a return to normal temperature between the first and second cycle.

Note 2: The temperature profile indicates the board surface temperature at the point of contacts with the connector terminals.

Manual soldering: 350°C for 3 seconds
Do NOT use flux compound when manual soldering.

Standard Thickness: 0.1mm
Open area ratios: Lead terminal: 90%
Ground terminal: 100%
Space-saving Thickness: 0.1mm
Open area ratios: Lead terminal: 90%
Ground terminal: 90%

Maximum of 0.02mm at the connector center, with both ends of the connector as reference points.

IPA (Isopropyl Alcohol) cleaning is permitted. (Cleaning is not recommended as it may change the feel of the mating and un-mating of the connector. Please contact your Hirose sales representative for information if you plan to use any other cleaning agents.)
Precautions

### Mating / un-mating

**[Standard]**
Mate the plug with the receptacle by pressing straight against the entire plug surface. Do NOT mate the plug while holding by the terminated cable.
Use a dedicated extraction tool to un-mate the plug.
Insert the tool under either end of the plug (clearance) and pull straight up as illustrated below.
Please refrain from removing by holding the electrical cable, otherwise this may result in cable disconnection, connector breakage and so on.

---

**[Space-saving]**
Mate the plug with the receptacle by pressing straight against the entire plug surface, the same as the standard. Use a dedicated extraction tool to un-mate the plug.
Insert the tool under the plug at the front side (clearance) and pull straight up, as illustrated below.
Do NOT mate / un-mate the connectors when receptacle is not mounted on the board.
Please refrain from removing by holding the electrical cable, otherwise this may result in cable disconnection, connector breakage and so on.

---

- Do not mate / un-mate the connectors when receptacle is not mounted on the board.
- In the manual soldering process, don't carry out the flux coating which will cause a flux blister on the connector.
- Different production lots may exhibit different shades of the insulator materials. No affect on form, fit or function of the connectors.
- Excessive scoop insertion or extraction may result in damage.
DF36 Series
0.4mm Pitch, 1.5mm Mated Height, Board-to-Fine Coaxial Cable Connectors
