DF57 Series Mating / Unmating Operation Instruction

**Mating**

1. By positioning the convexity of the socket sides to the header concavity, align the centers of the socket and the header in pitch direction.

2. Slightly press the socket down at cable side to tilted angle.

3. Press down at the lever side with stabilizing the cable side to insert. Mating completes.

**Unmating**

1. Hook the lever with finger nail.

2. Lift up to the upper direction and friction lock is released.

3. Lift up to the upper direction and positive lock is released. Removal completes.
