0.4mm Pitch, 1.5mm Board-to-Board Connectors with Dual Shielding

FX12 Series

Features

1. Dual shields
   Built-in shield plates and metal fittings in the plugs and receptacles prevent electromagnetic emission and external interference on the entire 360° periphery of mated connectors. (Fig.1, 2)

2. Low-Profile
   A board-to-board distance of 1.5mm combined with reduced mounting areas allow for use in space-limited applications. (Fig.3)

3. Self alignment
   Built-in self-alignment feature in the plug and receptacle allows mating / un-mating in limited spaces. (Fig.4)

4. Consistent mated retention force
   Indents in the shield plates and contact configuration assure consistent, mated retention forces regardless of the number of contacts. A positive, tactile “click” confirms the fully mated state.

5. Solder wicking prevention
   Nickel plating barrier on the contacts prevents solder compound intrusion (wicking) into the contact engagement areas.

6. High contact reliability
   The narrow female contacts have a curved shape that acts like a spring, producing a long wipe length during mating and results in high contact reliability.

7. Pick-and-Place automatic mounting friendly
   The compact, double shielded structure still provides enough area for vacuum pick-up machines when used in automated mounting methods.
   Receptacle: 0.8mm
   Header: 0.8mm

8. RoHS Compliant
   All materials and substances used to produce this product comply with RoHS standards.

In cases where the application will demand a high level of reliability, such as automotive, please contact a company representative for further information.

**Recommended PCB Layout and Metal Mask Dimensions**

Recommended metal mask thickness: 0.12 mm

**Notes:**
1. Positions marked □ indicate a ground circuit connections.
2. The co-planarity of SMT terminations is 0.1 maximum.
3. No polarity orientation for board mounting.
4. Do NOT place any components within area indicated by the broken line □□.
5. Do NOT place conductive traces in areas indicated by □□.
6. Dimensions in parentheses ( ) are reference dimensions.
7. All dimensions in mm.

**Recommended solder temperature profile.**

The temperature profile indicates the maximum temperature of the connector surfaces at the highest point from the PCB mounting surface.

< HRS test conditions >
- **Solder method**: Reflow
- **Environment**: Room air
- **Solder paste**: 96.5%Sn/3.0%Ag/0.5%Cu
- **Test board**: Glass epoxy
  - 40mm×30mm×1mm thick
- **Metal mask**: 0.12mm thick
- **Reflow cycles**: 2

Note 1: The temperature profiles shown are based on the above conditions.
Note 2: In individual applications, the actual temperature may vary, depending on solder paste type, volume/thickness and board size/thickness.
Note 3: Consult your solder paste and equipment manufacturer for specific recommendations.

### Washing Conditions

#### Organic solvent Washing

<table>
<thead>
<tr>
<th>Solvent type</th>
<th>Room temperature washing</th>
<th>Heated washing</th>
</tr>
</thead>
<tbody>
<tr>
<td>IPA (Isopropyl alcohol)</td>
<td>Yes</td>
<td>Yes</td>
</tr>
</tbody>
</table>

#### Water Type Washing

When using water type cleaning agents (e.g., terpene, and alkali saponifiers), select the cleaning agent based on the documentation issued by the various manufacturers of cleaning agents which describes the effects on metals and resins. Be careful that parts are not left with moisture remaining on them.

**Washing Precautions**

Residual flux or cleaning agent on the contacts when washing with organic solvents or water type cleaners can give rise to the deterioration of electrical performance. In this regard it is important to check whether a thorough washing has been performed.
## Handling Precautions when mating mounted connectors.

**Fig. 1**

<table>
<thead>
<tr>
<th>MAX 0.3</th>
<th>MAX 0.3</th>
</tr>
</thead>
<tbody>
<tr>
<td>FX12*-**S-0.4SV</td>
<td>FX12*-**P-0.4SV</td>
</tr>
</tbody>
</table>

**Start the engagement of the connectors within the specified self-alignment range of 0.3 mm, while keeping the boards parallel to each other.**

**Do NOT start mating of the mounted connectors at an angle. Correctly position the connectors over each other and assure that both boards are parallel to each other.**

**When the connectors are correctly aligned (and both boards are parallel to each other) apply even force until full mating is confirmed by the “click” sensation.**

**Caution**

When the connectors are mounted on the FPC, care should be taken to prevent the mated connectors from bending or twisting on the FPC. The device case or cushioning material should be used to keep the connectors fully mated and supported.

## Handling Precautions when un-mating

**Fig. A**

Keep the boards (with mounted connectors) parallel to each other.

**If parallel disconnection is impossible, start un-mating at one end, exercising extreme caution to apply force at the center of the connector itself, away from the solder joint rows (Ref. Fig A and Fig. B)**

**Do NOT start disconnection at the sides as the connector can be damaged, voiding the warranty and making the re-engagement impossible.**

Technical Documentation

- **Eye Pattern Output Waveform**
  - [700MHz]
  - [1GHz]
  - [2GHz]

- **Shielding Characteristics (1)** (Measurement Results Using a 2-Chamber Shielded Room)

Explanatory Note
Measurement values of the unshielded connectors were set as the zero level of the vertical axis of the graph. The graph uses unshielded connectors as the reference and indicates the noise leakage suppression (shielding) effect of the shielded connectors as a relative comparison value.

In comparison to the unshielded connectors there was a noise suppression effect of 10 dB to 30 dB over the frequency range of 100 MHz to 3 GHz.

- **Shielding Characteristics (2)** (Board-to-Board Shielding Comparison Using a Magnetic Field Probe Method: IEC 61967-6 Compliance)

Explanatory Note
A signal of the 266 MHz operating frequency was transmitted through all contacts, over a frequency range of 10 MHz to 3 GHz. The magnetic field leaking to the surroundings from the gap between the boards was measured with a magnetic probe to provide the (mapping data) results.
FX12 Series ● 0.4mm Pitch, 1.5mm Board-to-Board Connectors with Dual Shielding
