

DF60 Series

65A (Derating Curve, Ambient Temperature of 25°C), 10.16mm Pitch
Wire to Board Connectors for Internal Power Supply (UL, C-UL, TÜV Certified)

Power Supply

Positive-Lock

Compact

Apr. 1. 2026 Copyright 2026 HIROSE ELECTRIC CO., LTD. All Rights Reserved.

Features

1. Rated for up to 65A (Derating curve, ambient temperature of 25°C)

DF60 has the capacity to handle a Max. of 65A (Derating curve, ambient temperature of 25°C) when using 8 AWG wire with the single position connector. (Please refer to the chart for the rated current in other pin counts.)

2. Secure Lock Design Ensures Complete Mating

The locking design delivers a clear and tactile click, which prevents incomplete mating and reduces burden on workers for improved work efficiency.

Lock Design

3. Highly Reliable 5-Points Contact Design

Three independent contact springs provide a secure and high contact reliability using 5-Points contact.

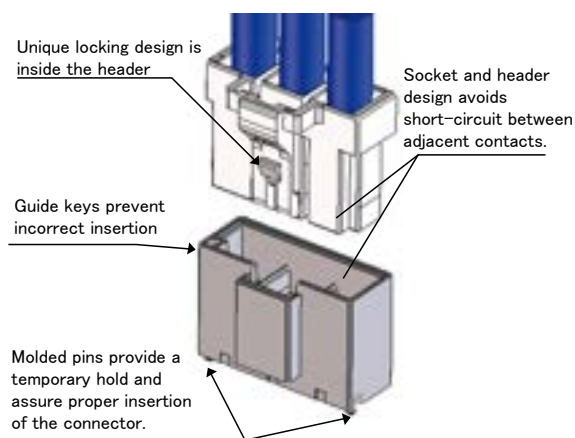

5-Points Contact

4. Molded Lance Design

The lance is actually part of the housing instead of being part of the terminal. This prevents tangled wires during assembly.

5. Reverse Mounting Prevention to PCB

The addition of a molded pin on the header allows temporary mounting retention and prevents reverse mounting on the PCB. (Right angle pin header has a metal fitting for this purpose.)

6. Short-Circuit Prevention

The wall design between the contacts helps to isolate the contacts and prevent short circuits between contacts.

7. Solder Crack Prevention

Glass-reinforced resin is used on the pin header to prevent solder cracks due to thermal contraction.

8. Finger-Safe (Electric Shock Prevention)

9. Right Angle Crimp Socket Type

Eliminates cable routing and contributes to small size applications and improved assembly efficiency.

10. UL, C-UL and TÜV Specifications Certified Type Available

11. Glow Wire Compliant (Compliant with IEC 60695-2-11)

Product Specifications

Items	Specifications	Conditions
Insulation Resistance	1,000M Ω Min.	Measured at 1,000V DC
Withstanding Voltage	No flashover or insulation breakdown	3,000V AC rms for 1 min
Contact Resistance	2m Ω Max.	Measured at 1A and 6V Max.
Vibration Resistance	No electrical discontinuity of 1 μs or more.	Frequency: 10 to 500Hz, Acceleration of 98 m/s ² 2 hours in each of the 3 directions
Shock Resistance	No electrical discontinuity of 1 μs or more.	Acceleration of 490m/s ² , 11ms, Sine halfwave: 3 times each in 3 axial directions
Humidity Resistance	Contact Resistance: 2m Ω Max. Insulation Resistance: 1,000M Ω Min	96 hours at temperature of 40 ± 2°C and humidity of 90% to 95%
Temperature Cycles	Contact Resistance: 2m Ω Max. Insulation Resistance: 1,000M Ω Min	-55°C : 30 minutes → 85°C : 30 minutes, 25 cycles
Mating Durability	Contact Resistance: 2m Ω Max.	30 times
Solder Heat Resistance	No dissolution of the resin part affecting performance.	Flow: 260°C , 10sec. Hand soldering: temperature of soldering iron at 350 ± 10°C for 5sec.

- Note 1: This is the maximum current rating while all pins are energized with the stated current rating.
When isolating power lines into multiple circuits, current ratings may go above the stated current ratings.
Please consult Hirose for details before doing this.
- Note 2: Includes temperature rise caused by current flow.
- Note 3: The storage condition refers to long-term storage of the product on the shelf before assembly.
Please use the operating temperature for temporary storage such as pre-assembly and during shipping.
- Note 4: Information contained in this catalog represents general requirements for this Series.
Contact us for the drawings and specifications for a specific part number shown.
- Note 5: The rated current is the current with a temperature rise of 30°C or less. [Standard value]
- Note 6: Indicates a current certified by UL at an ambient temperature of 25°C. [Reference value]

Materials / Finish

Strip Length: 6.5 to 7.5mm

Unit : mm

Part No.	HRS No.	A	B	Applicable Wire (Tin Plated Copper Wire) (Note 1)					Purchase Unit
				UL	Jacket Diameter	AWG	Core Structure	Packing Type	
DF60A-8PCFA(Note 2)	CL0680-3057-0-00	34.2	28.7	1283	4.9 to 7.8	8	7/24/0.26	Reel	700pcs per reel
DF60-8PCFA(07)	CL0680-3023-0-07	32.7	27.2		7.54			Loose Piece	100pcs per bag
DF60-8PCA(07)	CL0680-3048-0-07			1015	4 to 5.2	10	104/0.26	Reel	900pcs per reel
DF60-1012PCFA(07)	CL0680-3024-2-07	32.7	27.2			12	65/0.26		
DF60AA-1012PCFA	CL0680-0099-0-00	34.9	29.4	1015	4.69	10	104/0.26	Loose Piece	100pcs per bag
DF60-1012PCA(07)	CL0680-3049-3-07	32.7	27.2		4.04	12	65/0.26		

Note 1: For applicable cable other than those listed above, refer to Crimp Condition Table. Crimp Condition Table is available from Part No. link. (If you are using a cable that is not listed in Crimp Condition Table, please contact a Hirose sales representative.)

Note 2: Not conforming to finger-safe type.

Crimp Contact for Right Angle Socket

Strip Length: 6.5 to 7.5mm

Unit : mm

Part No.	HRS No.	Applicable Wire					Purchase Unit
		UL	Jacket Diameter	AWG	Core Structure	Packing Type	
DF60S-8SCFA	CL0680-3081-0-00	1283	4.9 to 7.8	8	7/24/0.26	Reel	700pcs per reel
DF60S-1012SCFA	CL0680-3082-0-00	1015	4 to 5.2	10	104/0.26	Reel	800pcs per reel
				12	65/0.26		800pcs per reel

Note: For applicable cable other than those listed above, refer to Crimp Condition Table. Crimp Condition Table is available from Part No. link.
(If you are using a cable that is not listed in Crimp Condition Table, please contact a Hirose sales representative.)

Applicable Crimping Tool

Item	Part No.	HRS No.	Applicable Contact	Remarks
Applicator	AP105-DF60-8	CL0901-4623-5-00	DF60-8SCFA	(Note 3)Manufactured by Japan Automatic Machine Co., Ltd.
	QHS895700H-UP	-	DF60-8PCFA(07) DF60A-8PCFA	
	AP105-DF60-1012	CL0901-4624-8-00	DF60-1012SCFA	(Note 3)Manufactured by Japan Automatic Machine Co., Ltd.
	QHS888000K-UP	-	DF60-1012PCFA(07) DF60AA-1012PCFA	
	AP105-DF60S-8S	CL0901-4041-0-00	DF60S-8SCFA	
	AP105-DF60S-1012S	CL0901-4042-0-00	DF60S-1012SCFA	
Press Body	-	-	-	The Hirose Press Unit CM-105C (HRS No.901-0001-0) has a capacity of 1.5 tons and cannot be used. Please use a press unit which can mount official Hirose's applicators and has a capacity of 3 tons or more.
Hand tool	HT306/DF60-8	CL0550-0301-4-00	DF60-8SCA DF60-8PCA(07) *Exclusive for UL1283, 8 AWG	
	HT306/DF60-1012	CL0550-0307-0-00	DF60-1012SCA DF60-1012PCA(07) *Exclusive for UL1015 10 and 12 AWG	

Note 1: Please contact our Sales Department when you are using crimp tools made by other manufacturers.

Note 2: Please do the crimping operations according to the "Crimping work standards" and "Crimping condition table".

Note 3: Please contact Japan Automatic Machine Co., Ltd. (hereinafter J.A.M.) through their website regarding crimping issues when using applicators manufactured by J.A.M. URL <http://www.jam-net.co.jp>

Mated Dimensions

● Wire to Board Connection (Straight Pin Header)

Standard Type, Straight Socket

DF60F
Finger Protection, Straight Socket

DF60FS
Finger Protection, Right Angle Socket

● Wire to Board Connection (Right Angle Pin Header)

● In-Line or Wire to Wire Connection

Standard Type, Straight Socket

DF60F
Finger Protection, Straight Socket

DF60FS
Finger Protection, Right Angle Socket

• Usage Example of Sequential Contact

Contact Extraction

- Contact Extraction Tool: Flat-Bladed Screwdriver, 1.4mm blade width.
- Intended Crimp Contacts: DF60-8SC(F)A, DF60-1012SC(F)A, DF60-8PC(F)A, DF60-1012PC(F)A, DF60S-8SC(F)A, DF60S-1012SC(F)A

1. After unmating the parts, position the flat-bladed screwdriver to raise the lance as shown in the illustration.

2. The lance needs to be raised sufficiently to allow the terminated wire to slip past it. The lance needs to be held up while at the same time pulling on the wire.

*Due to any previous repairs, the strength of the lance could have been deteriorated. Hirose recommends to use new crimp housing to assure proper performance.

⚠ Caution There are parts on the crimp contact that can cause injuries, please use caution when unmating the contacts.

Rated Values

Please avoid using the connectors above the ratings. Also, do not hot swap (Note 1).

Note 1: Hot swap refers to insertion while electricity is running.

Precautions

1. Recommended Soldering Conditions

- Soldering profile when using an automatic soldering device
Soldering temperature: 260°C, Soldering time: within 10 seconds
- Hand Soldering Conditions
Temperature of soldering iron: 350±10°C, Soldering time: within 3 seconds

2. Cleaning Conditions

Please refer to the "Product Guidelines (Board-to-Wire Connector Guidelines)".
Cleaning with IPA is allowed. (Other cleaning agents are not recommended due to may have caused changing the push pull feeling. Please contact us when you use other cleaning agents.)

3. Important Notes

1. Caution is required for mating and un-mating the connector without it being mounting on a PCB.
It can damage or deform the contacts.
2. During hand soldering, do not apply flux which can cause creeping-up flux to the connector.
3. This product may have a slight difference in color depending on the production lot.
This difference does not have any influence on the performance.
4. Black spots may appear on the mold resin but this does not affect the product quality.
5. The connector could be damaged if it is pulled out forcibly. When it is hard to pull out, push it in slightly first and then depress the lock and unmate.
Please refer to "DF60 Series Product Guidelines (Mating/Unmating Operation Instruction Manual)" for points in handling regarding mating operations.
6. When thick and short wire are used, the connector could be deformed due to the force of the wire's position.
Route cables in such a way that they do not twist when being installed.
7. Make sure to turn off the power when mating or unmating the connector.
8. Please do not touch any area around the contact part during energizing. It could be very dangerous.
9. Please refer to "Cable Assembly Instruction" for points in harness operations.

4. Precautions for use

Please refer to the "Product Guidelines (Board-to-Wire Connector Guidelines)".

5. Precautions for use of right angle pin header

Since the lead mounting part has some exposed parts, please insure sufficient clearance when mounting other parts near this connector.

6. Panel fixing operation of In-Line connector

(1) Insert a M3 nut from the lateral direction.

(2) Push the nut in the direction of the arrow.

(3) Nut insertion is then complete.

(4) Panel mounting is completed by installing a connector on the panel cutout hole and tightening with a M3 screw.

7. Operating Environment

Please contact us if you are designing this connector into environmental conditions where high and low temperatures are repeated.

While Taking into Consideration

Specifications mentioned in this catalog are reference values.

When considering to order or use this product, please review the Drawing and Product Specifications sheets.

Use an appropriate cable when using the connector in combination with cables.

If considering usage of a non-specified cable, please contact your sales representative.

If assembly process is done by jigs & tools which are not identified by Hirose, the warranty of the product may be affected.

If considering usage for below mentioned applications, please contact your sales representative.

In cases where the application will demand a high level of reliability, such as automotive, medical instruments, public infrastructure, aerospace/defense etc. Hirose must review before assurance of reliability can be given.
