## Overview

High Current Connector for Busbar applications. The pluggable busbar connector reduces man-hours required for construction and maintenance while improving safety.

## Features

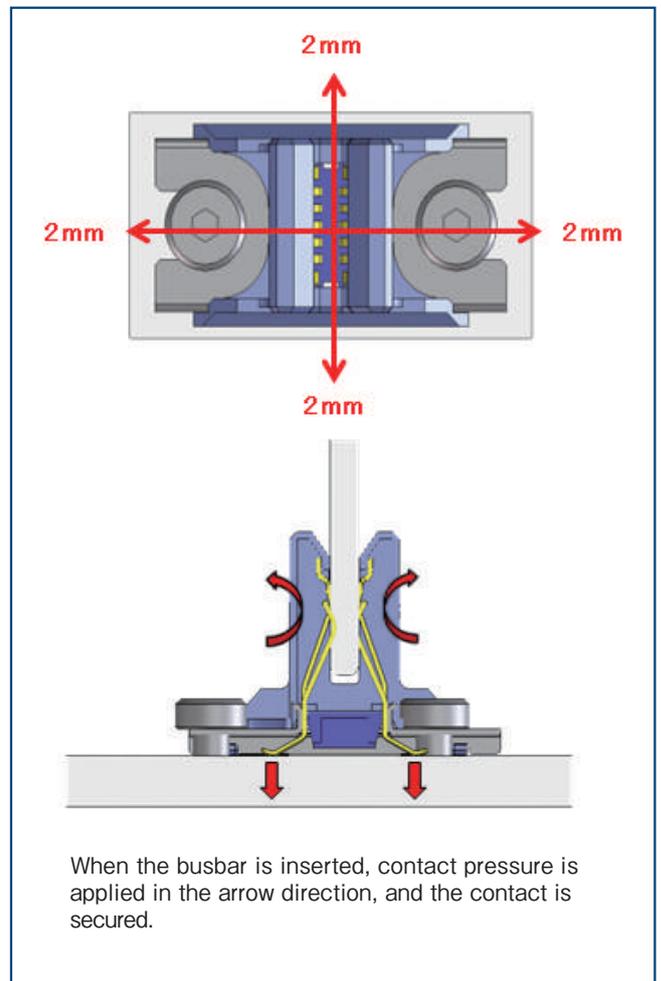

### 1. Supports High Current

Supports 150A (Derating curve, ambient temp 25°C : 400A) and 300A (Derating curve, ambient temp 25°C : 430A).

The current value varies based on the busbar's thickness.

### 2. Floating Structure (Patent pending)

Floating design with  $\pm 2\text{mm}$  allows for easy mating in blind mating situations where visual inspection isn't clear-cut. While the connector floats and moves within  $\pm 2\text{mm}$  when unmated, once the busbar is inserted, the contact pressure ensures stability.

### 3. Pluggable Busbar Connector

The pluggable busbar connector reduces man-hours required for construction and maintenance while improving safety.

### 4. Compact Design

Suitable for compact designs. Supports 1U rack size.
